ANNUAL AHERA NOTIFICATION

Landmark Christian School
September 21, 2016

Under the Asbestos Hazard Information Act (AHERA) of 1986, Landmark Christian School is required to notify all school building employees, building occupants or their legal guardians of the availability and location of the Asbestos Management Plans and of any proposed action activities including periodic re-inspections and surveillance activities that are planned or in progress.

In the past year, the routine AHERA-related activities conducted have been the periodic 6- month surveillance inspections to maintain the current information of the conditions of materials in our buildings and to prepare response actions for maintenance and renovation of affected buildings.

In the coming year, the planned activities under the AHERA Standard are routine maintenance of building material and the periodic 6-month surveillance of building materials. Maintenance and renovation response actions will be conducted as needed to maintain material in an acceptable state.

A copy of the Inspection Report and Management Plan for this Facility is available for public review in office of the Director of Operations on the bottom floor of the Auxiliary Gymnasium during normal working hours (8:00 AM to 4:00 PM). (Should that copy be temporarily inaccessible for any reason at any point in time, another copy of said report is available in the Business Manager's office (Annex Building, 95 Malone Street) during normal working hours.) Photocopies are available, upon written request to the Business Manager, only in completed sets, at twenty-five (25) cents per sheet. Please allow five (5) business days for processing of such photocopies.
